### **DETAILED ACTION**

1. The amendment filed November 20, 2006, has been received and entered. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior Office action.
2. Claims 7-11 have been cancelled.
3. Claims 1-6 are pending.

### ***Claim Rejections - 35 USC § 112***

4. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, for the reasons set forth in the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered but are not persuasive. Applicant argues that Examples 2-3 in the specification show how to administer the claimed composition to inhibit cancer. Applicant argues that this showing of inhibition enables the claimed invention. However, applicant's claims are drawn to *prevention* not to inhibition. Prevention is considered to be an absolute term that requires description of how to completely prevent in any every instance of cancer. It is well known in the art that there are many types of cancer caused by many different factors. Many of the causes of cancer are unknown. Applicant's specification does not set forth any evidence that the claimed product is able to prevent metastasis and cancer in all potential instances. In addition, applicant's specification only shows an inhibition of cancer and metastasis. There is no showing of complete prevention. Thus, a person of ordinary skill in the art would be forced to experiment

Art Unit: 1655

unduly in order to determine if applicant's invention actually function as claimed. Therefore, the claims are not considered enabled for the prevention of metastasis and cancer.

5. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 4 and 5 recite the limitation "the ingredient" in line 1. There is insufficient antecedent basis for this limitation in the claims.

***Claim Rejections - 35 USC § 102***

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001-010970 (English language translation provided) for the reasons set forth in the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered but are not persuasive. In response to applicant's argument that the reference is not using the composition of the same purpose as claimed, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. the composition taught by the reference is structurally the same composition. The prior art teaches extracting agaricus in the same manner as claimed by applicant. Thus, the reference properly anticipates the stated claims.

7. No claims are allowed.

Art Unit: 1655

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
